

## Sustainability Checklist for Watersport Centres

(Scuba, Sailing, Kayaking, Fishing, SUP, etc.)

| Environmental Policy & Training                               | Yes/No |
|---|--------|
| Have a written sustainability/environmental policy            |        |
| Provide environmental awareness training for staff            |        |
| Include sustainability in staff onboarding                    |        |
| Operations & Equipment  |        |
| Use eco-friendly cleaning products for gear and boats         |        |
| Maintain equipment to avoid pollution (e.g., oil leaks)       |        |
| Limit single-use plastics (e.g., cups, packaging)             |        |
| Marine Conservation   |        |
| Educate customers on wildlife interaction guidelines          |        |
| Avoid anchoring on sensitive habitats (e.g., seagrass, coral) |        |
| Participate in or support local conservation initiatives      |        |
| Waste & Water Management                                      |        |
| Offer refillable water stations                               |        |
| Clearly labelled recycling and waste bins onsite              |        |
| Encourage customers to bring reusable gear (bottles, bags)    |        |
| Carbon & Energy Use   |        |
| Use electric or fuel-efficient engines where possible         |        |
| Implement energy-saving practices in the facility             |        |
| Offset travel-related carbon emissions                        |        |
